A FAN-LED MOVEMENT / BUILT ON SOLANA

$SEPANG Whitepaper

Bring Formula 1 back to Sepang.

Fast. Forward. Malaysia.

A legendary circuit. A shared ambition. A community working toward a lasting return of the Malaysian Grand Prix.

01 / THE MISSION

Bring the lights back to Sepang.

Not just a memory. A future worth working toward.

$SEPANG is a community-driven Solana memecoin with a clear mission: to help bring the Formula 1 Malaysian Grand Prix back to Sepang on a lasting basis. Hosting fees and commercial commitments remain the practical barrier. The project is designed to help close that gap.

Creator fees generated by trading activity are intended to fund purchases of more $SEPANG tokens, growing the developer-held allocation. When its market value is enough to fully or partially cover the cost of hosting an F1 race at Sepang, the development team intends to make a formal offer to sponsor the race.

Sepang hosted Formula 1 from 1999 to 2017. Its technically demanding layout and passionate fans are at the heart of this mission. Community activity and fee-funded buybacks support the proposed commitment mechanism; neither growth nor a return of F1 is guaranteed.

02 / THE COMMITMENT

A clear mechanism.
An ambitious goal.

The commitment is a statement of intent, not a guarantee. There is no fixed dollar target. The offer can be made once the developer-held value can meaningfully fund all or part of the hosting fee.

01 **Creator fees**
Community trading activity generates creator fees.

02 **Token buybacks**
Creator fees are used to purchase more $SEPANG for the developer allocation.

03 **Dev holdings**
Fee-funded buybacks increase the dedicated token position. Its market value fluctuates and can fall.

04 **The trigger**
Developer-held token value is enough to fund all or part of an F1 race at Sepang.

05 **Formal offer**
The team intends to offer to sponsor the race, in full or as a partial sponsor alongside other backers. Acceptance is not assured.

> **VALUATION ≠ AVAILABLE CASH**
>
> A token valuation alone does not establish liquidity or the ability to fund a hosting fee. A sponsorship offer would not itself secure calendar approval or all the commercial commitments required for a race. Any partial offer would depend on other parties covering the remaining costs.

OPTIONAL / FUTURE FEATURE

A place for the fans.

A future fan contribution pool may allow F1 fans and $SEPANG holders to voluntarily contribute their own tokens alongside the developer allocation toward the same sponsorship goal.

Mechanics, custody and transparency details will be published before launch. This feature is not live. No one is required to contribute.

03 / HOME GROUND

More than a track.
A Malaysian icon.

Located in Selangor, Malaysia, Sepang is renowned for high-speed racing, dramatic weather and challenging corners. Designed by Hermann Tilke, it remains fully operational and hosts major motorsport events, including MotoGP.

5.543 km	1999–2017	Tilke
CIRCUIT LENGTH / 3.444 MI	MALAYSIAN F1 GRAND PRIX	CIRCUIT DESIGNER

A sustained F1 return would be a major cultural and economic moment for Malaysia.

04 / THE ROAD AHEAD

Five phases.
One direction.

A proposed path, not a delivery promise. No dates or completed milestones are asserted here; later phases depend on the threshold, approvals and real-world feasibility.

01

BUILD

Launch & community building

Token launch, memes, social growth and the start of fee-funded buybacks.

02

CONNECT

Awareness & accumulation

Explore partnerships and transparent tracking of developer holdings and buybacks.

03

INVOLVE

Fan pool

Develop optional, voluntary contribution mechanics so fans can add tokens to the sponsorship pool if they choose. Future feature.

04

OFFER

The trigger

When the developer-held value can fully or partially fund an F1 race, make a formal offer to sponsor it at Sepang.

05

ASPIRE

Race weekend

If a race is secured, celebrate F1 at Sepang with community events and $SEPANG branding, subject to permissions.

05 / VERIFY, DON'T JUST TRUST

On-chain.
Out in the open.

Inspect the contract and the developer wallet directly. The community can track the token allocation and transactions as buybacks progress. No live balances or progress figures are claimed on this page.

06 / READ BEFORE PARTICIPATING

Important disclaimer

$SEPANG is a memecoin created for entertainment and community purposes. It has no intrinsic value and should not be considered an investment. The cryptocurrency market is highly volatile and speculative.

The commitment described here is a statement of intent by the development team. While the team intends to use creator fees to buy more tokens and, when the value of developer-held tokens is enough to fully or partially host an F1 race, to offer to sponsor an F1 race at Sepang, and may in future enable optional fan contributions to a sponsorship pool, there is no guarantee that any target will be achieved, that an F1 race will be hosted, or that any specific outcome will occur.

This is an independent fan-led project. This page does not assert any official affiliation, endorsement or agreement with Formula 1, its teams, or Sepang International Circuit. No returns are promised. You may lose the entire amount you spend on tokens.
